

MAXSTREAM 300

LOW FLOW CHAMBER CLEAN REMOTE PLASMA SOURCE

The MAXstream[™] 300 is a compact, reliable, and cost-effective remote plasma source (RPS) solution for low flow (2 to 3 SLPM) NF₃ chamber clean applications. The MAXstream 300 is 18% smaller than the Xstream RPS unit to save valuable tool space and offers drop-in compatibility with traditional RPS tools, allowing customers an easy upgrade path to improved performance and reliability. Market leading power accuracy of 2% for improved process repeatability along with AE's proprietary aluminum (AI) substrate with Type 3 hard anodization combine to make it one of the most consistent and reliable RPS units on the market.

PRODUCT HIGHLIGHTS

- Compact, low cost-of-ownership solution for 2 to 3 SLPM chamber cleaning processes
- Industry-leading power accuracy of 2% for consistent, repeatable performance
- Proprietary high-purity AI substrate with Type 3 anodization for longer chamber life
- Unique dual ignition core design ensures virtually 100% ignition reliability
- Drop-in compatibility with traditional RPS systems to enable simple design-in compatibility as well as seamless field upgrades to a reliable, repeatable, and low cost-of-ownership solution

TYPICAL APPLICATIONS

NF₃ chamber clean

PROCESS AND ELECTRICAL SPECIFICATIONS

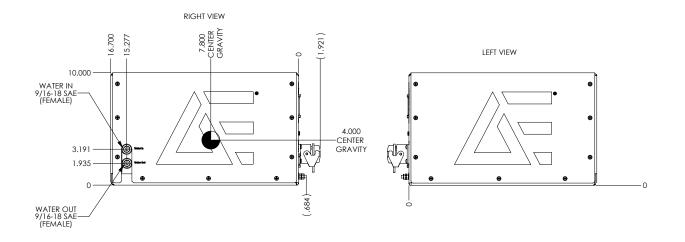

General Operating Parameters				
Plasma Power Range	300 to 6000 W, continuous			
Process Applications	Remote delivery of activated gases for downstream processing (i.e. chamber cleaning, reactive etching processes, and reactive deposition processes)			
Ignition	100 mTorr to 4 Torr up to 2 SLPM of Ar, <1% poisoned by $\rm NF_3$			
Power Accuracy	±2% or 15 W, whichever is greater			
Chemical Compatibility	This unit is intended for use with selected gases such as Ar, O_2 , H_2 , N_2 , F_2 , H_2O , NF_3 , Cl or NH_3CxFy .			
NF ₃ Operating Specifications				
Flow Range	Up to 3 SLPM at 10 Torr			
Dissociation Efficiency	> 98% disassociation up to 3 SLPM at 10 Torr			
Operating Specifications				
Duty Cycle	Continuous operation within specified operating range			
Cooling Flow Rate	1.5 GPM at +5°C to +35°C non-condensing input water temperature			
Ambient Air	+5°C to +40°C, non-condensing humidity <75%			
AC Electrical Requirements				
Input Voltage	187 to 229 VAC, no neutral, 3 phase with PE ground (phase insensitive)			
Line Frequency	47 to 63 Hz			
Input Current	< 24 A AC			

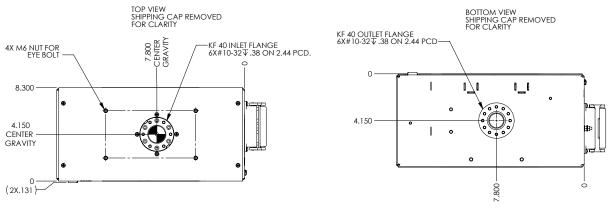

MECHANICAL SPECIFICATIONS

Mechanical and Physical Specifications		
Dimensions	25.4 cm (H) x 21 cm (W) x 42.4 cm (D)	
	10" (H) x 8.3" (W) x 16.7" (D)	
Weight	21 kg (45 lb)	
Vacuum	Input: KF40 flange on top side of the unit	
	Output: KF40 interface on bottom of unit	
Ground Connection	Chassis ground stud 1/4"-20 x 3/4" near AC input connector	
USB Connection	USB Type A female	
Ethercat Connection	RJ45 female	
Water Connections	Stainless steel Female SAE 9/16" – 18 straight-thread

MAXSTREAM 600, 800, 1000, AND 1200

MID-FLOW CHAMBER CLEAN REMOTE PLASMA SOURCE

The MAXstream[™] 600, 800, 1000, and 1200 are reliable and cost-effective remote plasma source (RPS) solutions for mid-flow (6 to 12 SLPM) NF₃ chamber clean applications. The MAXstream has smaller footprint than the Xstream RPS unit to save valuable tool space and offers drop-in replacement capabilities for traditional RPS tools for easy integration. Marketleading power accuracy of 2% for improved process repeatability along with AE's proprietary aluminum (AI) substrate with Type 3 hard anodization combine to make it one of the most consistent and reliable RPS product on the market.

PRODUCT HIGHLIGHTS

- Higher power and flow for maximum chamber cleaning efficiency and less production downtime for cleaning
- Industry-leading power accuracy of 2% for consistent, repeatable performance
- Proprietary high-purity AI substrate with Type 3 anodization for longer chamber life
- Unique dual ignition core design ensures virtually 100% ignition reliability
- Drop-in compatibility with traditional RPS systems to enable simple design-in compatibility as well as seamless field upgrades to a reliable, repeatable, and low cost-of-ownership solution

ABOUT ADVANCED ENERGY

Advanced Energy (AE) has devoted more than three decades to perfecting power for its global customers. AE designs and manufactures highly engineered, precision power conversion, measurement and control solutions for mission-critical applications and processes.

AE's power solutions enable customer innovation in complex semiconductor and industrial thin film plasma manufacturing processes, demanding high and low voltage applications, and temperature-critical thermal processes.

With deep applications know-how and responsive service and support across the globe, AE builds collaborative partnerships to meet rapid technological developments, propel growth for its customers and power the future of technology.
